Re: 2009-10 Grand Jury Report, Hazardous Materials Handling in Solano County
Report Date: December 14, 2009

After receipt of the Grand Jury Report referenced above, the City of Vallejo reviewed the findings and responds as follows:

The report identified several findings and recommendations in the report, and noted procedures that had been put in effect from a previous report. The City of Vallejo is happy to report that the procedures noted in the previous report have continued, and there have been no additional complaints or issues related to those procedures.

In response to Finding and Recommendation #1, the City of Vallejo has and will continue to adhere to the requirements on California Health and Safety Code, Chapter 6.95. There is no informational signage required for this site, and the City of Vallejo does not desire to post signage that would advertise existence of the site and potentially increase the possibility of citizens depositing hazardous substances in front of the site for disposal.

In response to Finding and Recommendation #2, the City of Vallejo is changing the locks at the facility to limit the number of personnel that have access to the site. Signage has been ordered to post inside and outside the facility that will list the property as City of Vallejo property with an emergency contact number of 911 listed on the signage.

Proposed Resolution:

The City of Vallejo will continue with the procedures noted in the previous report. The City of Vallejo will have new locks to limit access and new signage for the property posted within sixty (60) days of this letter. The City of Vallejo invites the Grand Jury to perform a reinspection of the property for compliance on or after May 15, 2010.
